STOP Program

The STOP patch is 3" in diameter and applied to the jersey, centred on the back of the shirt, just above the numbers and below the name patch.

Please ensure that application and positioning of the patches on your jerseys is adhered to for maximum effect.

The STOP patch is a nylon material and is easy to sew on. The patches also come with an iron-on backing to allow for easy heat applications. To apply with an iron or heat press, please follow the directions below:

Temperature: 310° to 320°

Time: 20 seconds

PSI: 60

This application method works best with top and bottom heat.

The placement of the STOP patch on the jersey is strongly recommended to be placed directly above the numbers, below the name/sponsor tag on the backs of jerseys.
